

August 27, 2019

To whom it may concern:

We are pleased to provide a letter of recommendation for Masotti Construction Inc., in relation to their experience, capabilities and professionalism. We have worked with Masotti Construction Inc. and their team and have had a positive working relationship with the entire team. Marc Masotti has been our primary source of collaboration in dealing with Masotti Construction Inc. and has always managed the contractual and services side of the team with high level of professionalism. We hold his character and experience at a very high standard that is exhibited by the manner in which their service is delivered. His leadership throughout our project experience has been very well managed. We have utilized their construction services for many aspects relating to construction and project management services. Their attention to detail surrounding site administration, site coordination, and site safety are above standard.

In addition to the administration capabilities, they are also able to provide a high standard of construction in the areas of self-performed work. In house capabilities such as rough carpentry, wood framing, finish carpentry, moisture barrier and window installation are also achieved with the same high standard. In addition to their years of experience in the construction industry, they also have the respect for fellow project personnel that include architects, engineers and other tradesmen to ensure successful project delivery.

We look forward to future opportunities of working with both Marc Masotti and Masotti Construction again and would highly recommend their team on any residential project.

Sincerely

Dan Amicone OAA AIA MRAIC
